ACCESS TO OVER 5,000 YANMAR ENGINE TYPES IN THE GRANIT WEBSHOP

The spare parts wholesaler GRANIT PARTS now offers extended online access to spare parts data for more than 5,000 engine models from YANMAR. With the redesign of data access, access to spare parts information for industrial diesel engines for agricultural and construction machinery is now significantly easier. GRANIT customers throughout Europe will benefit from the new YANMAR engine database and can easily identify the right spare parts for machines from numerous manufacturers as well as different machine types.

Heeslingen, April 11, 2022 - With YANMAR, GRANIT has one of the most globally renowned manufacturers for drive systems in its program. The traditional Japanese manufacturer has distinguished itself since the introduction of the world's first compact diesel engine in the 1930s with its enormous know-how and a regularly expanded product and service portfolio. For this reason, we are now consolidating our partnership with YANMAR with a comprehensive expansion of the information available on the GRANIT webshop. The wholesaler now offers spare parts information based on drawings data for YANMAR engines.

With this offer, GRANIT reaches a new milestone in the company's history. It significantly increases the webshop quality of the spare parts wholesaler with Europe's leading product range. The broad positioning not only secures the future of the Lower Saxony-based company, but also provides customers with easy access to YANMAR original spare parts.

GRANIT
QUALITY PARTS

Pressemitteilung

The YANMAR engine search in the GRANIT webshop gives you clear access to all available replacement parts for YANMAR engines (which are installed by a wide range of manufacturers in many machine types). Based on the YANMAR engine number, the appropriate replacement parts are displayed in the GRANIT webshop. The offer includes all spare parts for more than 5,000 types of engines.
